

# PowerLearn

Learn on the go...

**PowerLearn is a highly flexible and easy-to-use E-learning system designed specifically for English language learners. With PowerLearn you will discover new ways to perform language training tasks faster and more easily. It is easy to use, just like using a book. Simply click on pages to access exercises and complete tests. The benefit of using PowerLearn over any other software is that PowerLearn is specifically designed for students who do not have much knowledge of using computers.**

## Software Characteristics

The **PowerLearn** software is entirely on-line. This means that you can access it whenever you want, wherever you are. We have worked to create a system that is available in the home and office, for use by both individuals and organisations. Our team is constantly working on software enhancements and adding new features to the system, in order to keep the program up-to-date and one step ahead of the rest.

The **Login** page is for entering your pin number. If you have any problems, there is a **Help** section where you can find more information about how to log in to the system using articles and tutorial videos from **PowerLearn Wiki**. **PowerLearn Wiki** offers help and explanations for all aspects of **PowerLearn**.

The **PowerLearn Wiki** articles are available in more than one language.

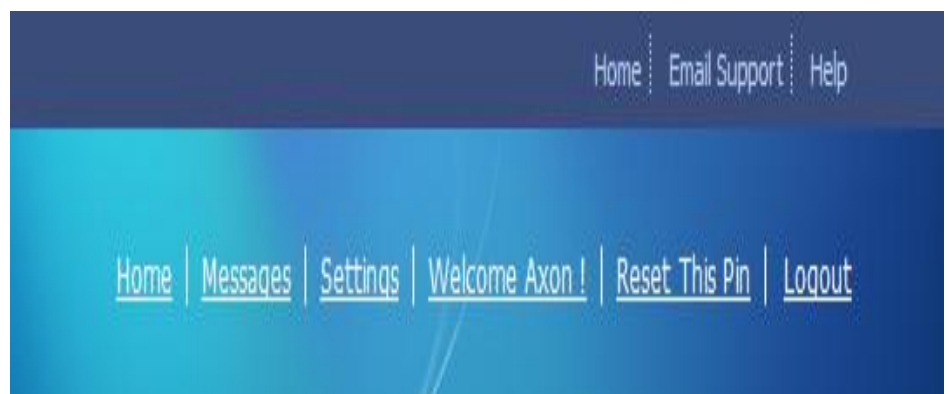

**POWERLEARN** also offers a customer comment form (**CCF**) where students can help develop **POWERLEARN** through their suggestions and remarks. Student satisfaction is our top priority.

The interface is modern and easy to work with it. Our **Dashboard** after logging in to the system offers a quick overview of all the user information. You can also check for the latest updates and latest news about software or exercises.

**PowerLearn** comes with a plenty of tools that facilitate communication and support. At the top of the toolbar there is an **Email Support** button where students can send their problems, questions, etc. to the team.

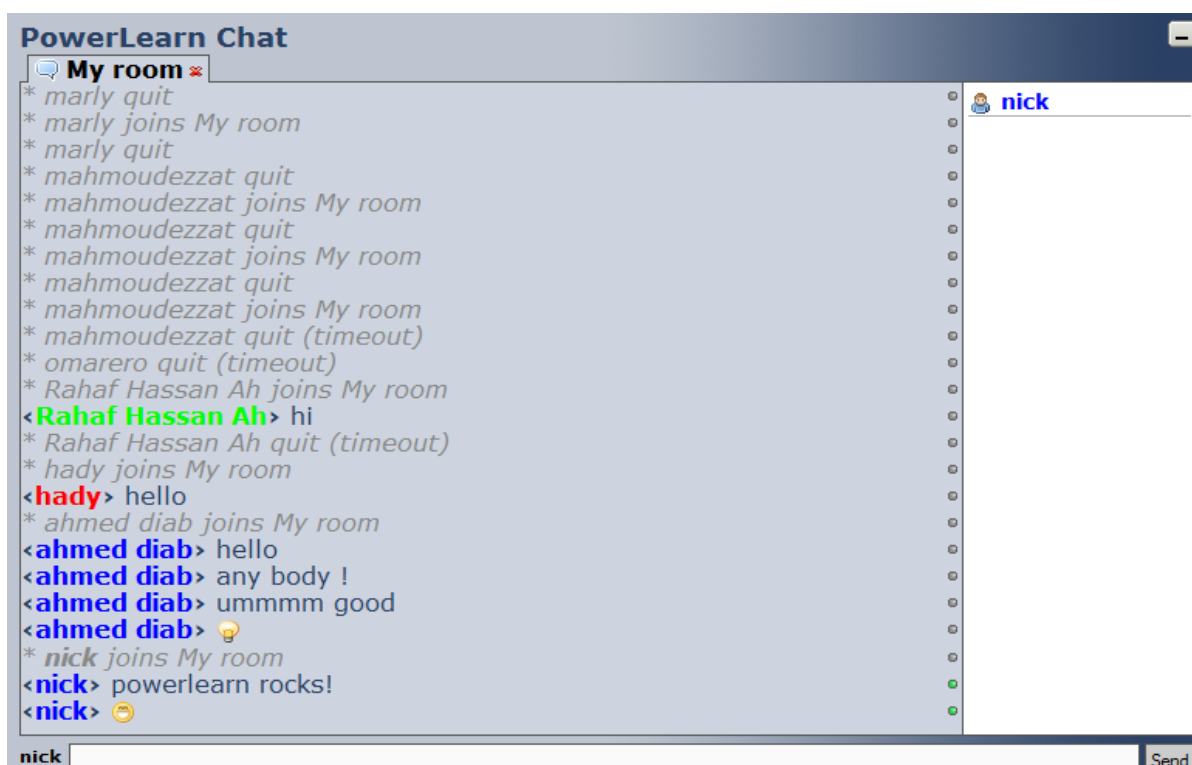

There is also a **Live Support** option which you can use to communicate real-time with an on-line support agent.

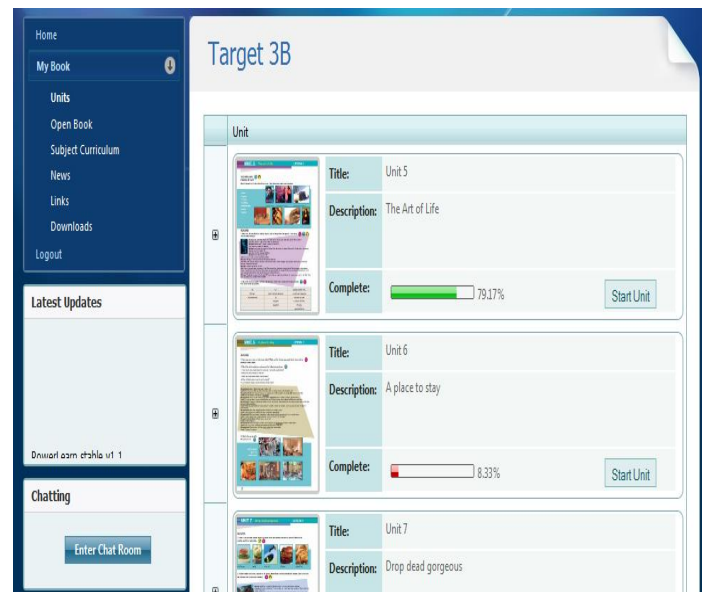

In order to communicate between users there is a **Private Message System** where text messages can be sent between students and teachers, and between the students themselves.

Finally, there is an on-line **Chat Room** which students can use to communicate for academic or social purposes.

## Learning Characteristics

Students select their book and can see their progress for each unit; in this way they can easily monitor their development, making it easier for them to work on their weaknesses and improve their strengths.

One of the most remarkable advantages of **PowerLearn** is that the program includes the complete book. Students can open their book on-line and start reading it.

**PowerLearn** supports different kinds of exercises and has a variety of different activities.

### **Supported Exercise Types:**

- **Single choice questions:** Students select one correct answer for each question.
- **Multiple choice questions:** Students select one or more correct answers for each question.
- **Text filling tasks:** Students complete a text by writing the correct word or phrase in the gaps.
- **Dropdown questions:** Students select the right answer to a question from a dropdown list.
- **True-False tasks:** Students decide if the statements are true or false.
- **Short answer questions:** Students write a sentence or short answer in response to a question.
- **Gap-fill tasks with drag-drop:** Students drag the correct words or phrases into empty spaces.
- **Group making tasks:** Students organise words or sentences into related groups.
- **Word order tasks:** Students put words into the correct sequence in order to make full sentences.
- **Sentence order tasks:** Students create a meaningful dialogue by putting sentences into the right order.
- **Matching words with pictures:** Students drag the correct words to the related pictures.
- **Matching pictures with the correct response from the dropdown menu:** Students select the correct word or sentence from a dropdown list.
- **Matching words and phrases:** Students match words or phrases to create collocations or full sentences.
- **Dialogue completion tasks:** Students complete a dialogue by using gap-filling or dropdown features.

PowerLearn supports images, videos, flash, and text in every exercise.

As students complete exercises, their progress is monitored and displayed on the **Progress Chart** on the **Dashboard**.

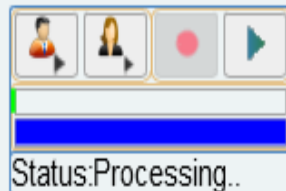

## Pronunciation Score System

**PowerLearn** has a new advanced pronunciation system. In each unit, students can listen to the pronunciation of each new item of vocabulary. Moreover, they can also record their own voice and receive detailed feedback on the accuracy of their own pronunciation.

## Email Alert Mechanism

When students finish each book, an email mechanism sends the test results to the teacher, and to school admin or parents. In this way specific persons can check student productivity.

## School Admin Panel

Schools can easily monitor their students' progress by accessing the school page. Using this page, schools can check each student's statistics, as well as view test results and teacher productivity.

## Support Service

You can email us at [support@powerlearn.uk.com](mailto:support@powerlearn.uk.com). This is our support department where you can send us your issues and queries. Our support department works on-line all weekdays from 08:00 – 20:00 GMT.
